

YOUR STEPS TO CERTIFICATION

ISO (International Organization for Standardization) is the world's largest developer of standards. ISO standards contribute to making the development, manufacturing and supply of products and services more efficient, safer and cleaner. When the large majority of products or services in a particular business or industry sector conform to International Standards, a state of industry-wide standardization can be said to exist. This is achieved through consensus agreements between national delegations representing all the economic stakeholders concerned - suppliers, users, government regulators and other interest groups, such as consumers. They agree on specifications and criteria to be applied consistently in the classification of materials, in the manufacture and supply of products, in testing and analysis, in terminology and in the provision of services. In this way, International Standards provide a reference framework, or a common technological language, between suppliers and their customers - which facilitates trade and the transfer of technology.

IMPARTIALITY AND INDEPENDENCE

D.A.S. Certification India Private Limited, representing D.A.S. Certification Limited, UK is an independent certification body, set up to provide certifications to UKAS (United Kingdom Accreditation Services) and accredited certifications to various schemes like ISO 9001, ISO 14001, ISO 27001, etc.

SERVICE TAILORED TO YOUR BUSINESS

We provide certification service to satisfy your business, with:

- Audit programs and dates to suit your business requirements
- Matching audit skills to your requirements, products, technology, processes and services
- We have our Management System Auditors and Technical Specialists
- Open-book approach to Auditing
- Improvements identified

ENQUIRY & FREE ESTIMATE

Following your enquiry and completion of our application and questionnaire we review that information and provide you with a free estimate. There are no fees until you accept the estimate and return the signed contract that includes the conditions for certification. We contact you to start the certification process and agree dates for the Stage 1 Audit, assign an auditor who contacts you to finalise arrangements.

STAGE 1 AUDIT

The Stage 1 Audit, on site, provides a focus for planning the Stage 2 Audit, reviews documentation specific to your business and works with your staff to quickly resolve any problems.

STAGE 2 AUDIT

The Stage 2 Audit measures the effectiveness of the Management System in managing the activities, products, processes and services to meet the requirements as stated by the standards and your commitment. The audit is carried out alongside your own people, with results and findings openly discussed and reviewed. At the end of the audit a report is prepared for acknowledgment and acceptance by your company representative. Any corrective actions arising from the audit are discussed and any forward plan of work agreed, including a follow-up visit if needed.

CERTIFICATION APPROVAL & SURVEILLANCE PROGRAM

When your Management System complies with the standard, a certificate of approval is issued, which is valid for three years, subject to satisfactory on-going maintenance of your management system. Verification is through an audit surveillance programme that is carried out through surveillance visits organized to fit in with your business requirements.

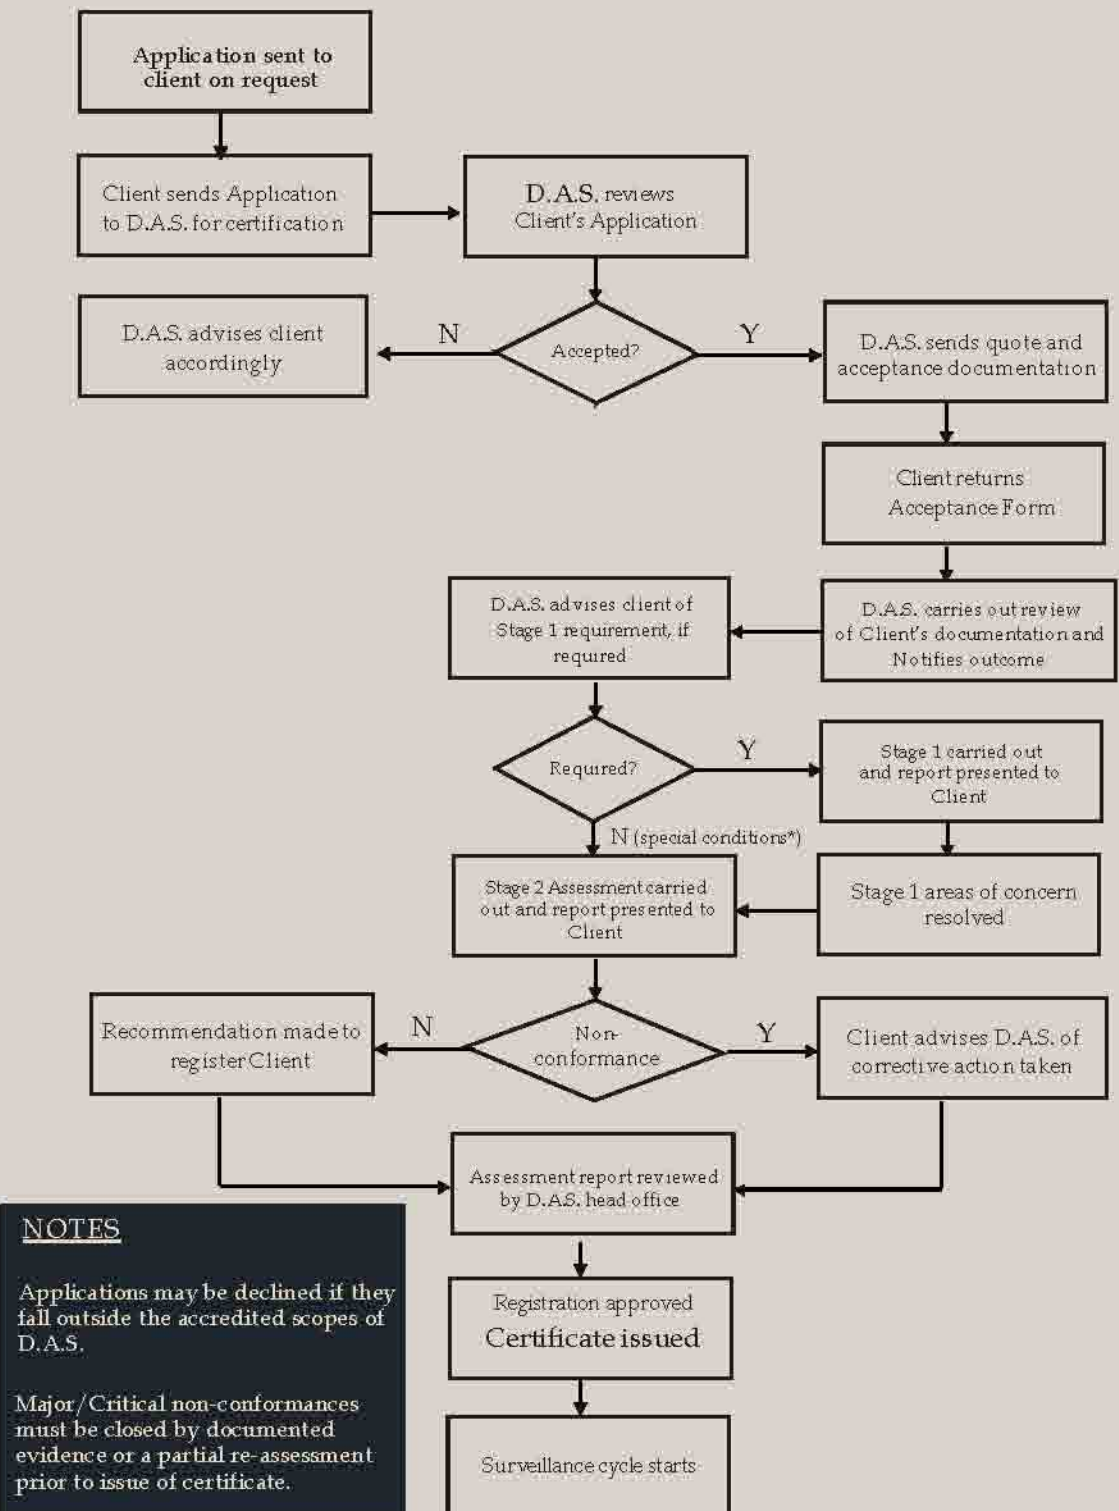

THREE-YEARLY RE-ASSESSMENT VISIT

Every 3 years your management system needs to be re-assessed. Following satisfactory reassessment your certificate is reissued for further three years.

CLIENT CERTIFICATION FLOW

DAS CERTIFICATION INDIA

This flowchart illustrates the ISO certification process, from initial application by the client to registration and certificate issue by DAS

*Stage 1 and 2 can be conducted together on certain conditions

CERTIFICATION MANAGEMENT SYSTEMS

ISO 9001:2008

Quality Management System – Requirements - Starting from the post world-war times, the quality management system standard has evolved itself into an International standard. This standard is designed to be integrated with other management system standards. As a five-element standard, it details the minimum requirements for Quality Management System, Management Responsibility, Product Realization and Measurement, Analysis & Improvement.

ISO 14001: 2004

Environmental Management Systems – Requirements - In the early 1990's, the international community collectively agreed to the need for a structured approach to Sustainable Development. ISO 14001:2004 is an auditable International Standard and presents requirements for Environmental Management System in 5 separate elements – Environmental Policy, Planning, Implementation & Operation, Checking and Management Review. This standard is written to allow integration with ISO 9001:2008.

OHSAS 18001:2007

Occupational Health and Safety Management System – Specifications. This International Standard bears similarity with the ISO 14001 standard, viz. the OHS management system has been specified in 5 separate elements, OH&S Policy, Planning, Implementation & Operation, Checking & Corrective Action and Management Review.

ISO 22000: 2005

Food Safety Management System – Requirements for any organization in the food chain - This auditable International Standard specifies the requirements for a food safety management system that combines the following generally recognized key elements to ensure food safety along the food chain, up to the point of final consumption: – interactive communication; – system management; – prerequisite programmes; – HACCP principles.

ISO 27001: 2005

Information technology – Security techniques – Information Security Management System – Requirements - This International Standard has been prepared to provide a model for establishing, implementing, operating, monitoring, reviewing, maintaining and improving an Information Security Management System (ISMS). The standard also provides auditable control objectives and controls required for an effective ISMS, adopted originally from ISO 17799.
